Rekindle & Rise App

User Roadmap & 5 Main Tabs

A safe, supportive digital space for burn survivors, caregivers, and community initiatives.

1 Onboarding Roadmap

1. Welcome
2. Choose User Type
3. Create Account
4. Set Privacy
5. Optional Healing Profile
6. Explore the App

2 5 Main Tabs

Tab 1: Home

- Upcoming events
- Posts from survivors
- Posts from initiatives
- Event calendar
- Quick actions: journal, groups, RSVP

Tab 2: Community

- Messaging & group chats
- Forums based on location
- Topic-based groups
- Moderated, supportive discussions
- Report, block, and safety tools

Tab 3: Healing Journal

- Private by default
- Healing journal entries
- Fun activities
- Journal prompts
- Mood check-ins & milestones

Tab 4: Profile & Account

- User profile
- Account details
- Burn-related data about a member
- Visibility controls
- Security & HIPAA review requirements

Tab 5: About Rekindle & Rise

- Introduction to the initiative
- About the founder
- Mission & community goals
- Website link
- Volunteer and contact info

3 Returning User Journey

Sign in → See home updates → Join a conversation → RSVP to an event → Write in journal → Come back for support

4 Privacy & Safety

- Journal is private by default
- Users choose what profile details to share
- Community participation is opt-in
- HIPAA/legal review needed before handling sensitive health data
- Strong moderation and reporting tools are essential

5 Development Phases

Phase 1: MVP
Home, events, forums, journal, profiles

Phase 2: Community Growth
Verified organizations, reminders, saved posts

Phase 3: Personalized Support
Milestones, activity recommendations, peer matching

Phase 4: Health Partnerships
Provider partnerships after legal/security review

Rekindle & Rise — supporting survivors through community, education, and healing.

Rekindle & Rise App — User Roadmap

1. Purpose

The Rekindle & Rise app will provide burn survivors and their supporters with a safe digital space to:

- Find supportive events and organizations
- Connect with other survivors
- Participate in location-based community forums
- Privately document their healing journey
- Discover activities and journal prompts
- Control how much personal and burn-related information they share

The platform should support emotional connection without positioning itself as a substitute for professional medical or mental-health care.

---

2. Primary User Types

Survivor

The primary user. Survivors can join forums, attend events, view community posts, and use the private healing journal.

Caregiver or Family Member

Can access educational resources, events, and designated caregiver communities. They should not be able to access another member's journal or medical information.

Burn-Support Initiative

Approved organizations can publish events, volunteering opportunities, educational posts, and initiative updates.

Moderator or Administrator

Rekindle & Rise administrators can approve organizations, moderate content, respond to reports, manage events, and suspend unsafe accounts.

---

3. First-Time User Journey

Step 1: Welcome to Rekindle & Rise

The first screen provides:

- A brief introduction to the community
- The Rekindle & Rise mission
- A statement that the app is a peer-support platform
- Buttons for **Create Account**, **Sign In**, and **Learn More**

A shortened version of Tab 5 should appear here so users understand the organization before creating an account.

Step 2: Select User Type

The user selects:

- Burn survivor
- Caregiver or family member
- Volunteer or supporter
- Organization representative

The selection determines which communities, prompts, and onboarding questions appear.

Step 3: Age and Consent

Ask for the user's age or date of birth.

Recommended initial approach:

- Allow independent accounts for users aged 13 and older
- Require acknowledgment of community and privacy rules
- Do not launch accounts for children under 13 until parental-consent procedures have been legally reviewed

Step 4: Create Account

Required information:

- First name or display name
- Email address
- Password
- Age confirmation
- General location, such as city, county, or region

Do not require a precise address.

Optional settings:

- Profile photograph
- Pronouns
- Notification preferences
- Anonymous display name

Step 5: Privacy Setup

Before asking for burn information, explain:

> Your healing information is private by default. You choose what other members can see.

Users select a default profile visibility:

- Private
- Visible to joined groups
- Visible to the Rekindle & Rise community

Each sensitive profile field should also have its own visibility control.

Step 6: Optional Healing Profile

The user may provide:

- General stage of recovery
- Year of injury
- Topics they would like support with
- Types of events they are interested in
- Whether they want to connect with survivors who have similar experiences
- Accessibility requirements

Detailed medical information should be optional and private by default. Every question should include **Prefer not to answer** and **Skip for now**.

Step 7: Select Interests

Examples include:

- Emotional support
- Returning to school or work
- Family and caregiver support
- Confidence and body image
- Burn prevention education
- Volunteering
- Art and creative activities
- Local survivor events
- Virtual events

Step 8: Community Guidelines

Users acknowledge rules covering:

- Respectful communication
- No harassment or discrimination
- No graphic images without warnings
- No requesting or giving individualized medical diagnoses
- No unauthorized sharing of another person's information
- No fundraising scams or unapproved promotions
- How to report or block another user

Step 9: Personalized Home Page

The user enters Tab 1 and sees content based on location, interests, joined groups, and upcoming events.

---

4. Tab-by-Tab User Roadmap

Tab 1: Home

Main purpose

Provide a personalized overview of what is happening in the burn-survivor community.

Home-page sections

1. **Welcome Card**
    - Personalized greeting
    - Short supportive message
    - Quick access to the journal
2. **Upcoming Events**
    - Local events
    - Virtual events
    - Rekindle & Rise events
    - Events from verified organizations
3. **Community Posts**
    - Survivor stories
    - Questions and discussions
    - Recovery milestones
    - Encouraging posts
4. **Initiative Updates**
    - Care-kit drives
    - Burn-prevention workshops
    - Volunteer opportunities
    - Fundraisers
    - Educational campaigns
5. **Quick Actions**
    - Write in journal
    - Find an event
    - Join a local group
    - Create a post

Event flow

View event → Read details → Check accessibility and location → RSVP → Add reminder → Attend → Provide optional feedback

Event details should include:

- Date and time
- In-person or virtual format
- Location
- Host organization
- Age restrictions
- Accessibility information

- Cost, if applicable
- Registration requirements
- Contact information

Calendar view

Users can switch between:

- Event cards
- Monthly calendar
- List view
- Local events
- Virtual events
- Saved events

Tab 2: Community

Main purpose

Create safe group conversations based on location, experience, and interests.

Community organization

Location-based groups

Examples:

- Bay Area Burn Survivor Community
- Northern California Survivors
- Southern California Survivors
- National Virtual Community

Use general geographic regions rather than exact user locations.

Topic-based groups

Examples:

- Teen Survivors
- Adult Survivors
- Caregivers and Families
- Returning to School
- Returning to Work

- Confidence and Self-Image
- Long-Term Recovery
- Burn-Prevention Volunteers

Group-joining flow

Browse groups → Review description and rules → Join group → Choose notification level → Introduce yourself or browse privately

Community features

- Discussion posts
- Group-chat conversations
- Comments and reactions
- Polls
- Pinned resources
- Event announcements
- Anonymous posting where appropriate
- Report, mute, and block controls

Safety controls

- Moderators approve sensitive or flagged content
- Graphic content requires a warning and hidden preview
- Users can block private messages
- New accounts have limited posting privileges until verified
- Organization accounts receive a visible verification badge
- Personal phone numbers and precise addresses should be discouraged in public conversations

One-to-one direct messaging should be considered only after group moderation and reporting systems are operating effectively.

Tab 3: Healing Journal

Main purpose

Give users a private space to reflect on their healing journey.

Privacy rule

The journal is **private by default**.

Journal entries should never automatically appear on the user's profile, home feed, or community groups.

Journal features

- Free-writing entries
- Guided prompts
- Mood check-ins
- Gratitude entries
- Recovery milestones
- Personal goals
- Photo attachments
- Voice-to-text entries
- Calendar history
- Search by date or topic
- Optional device lock or biometric protection

Example journal prompts

- What made you feel strong today?
- What is something you handled better than before?
- What would you like others to understand about your experience?
- What is one activity that made you feel comfortable?
- Who supported you this week?
- What is one goal you would like to work toward?
- What does healing mean to you today?

Fun and restorative activities

- Digital coloring activities
- Gratitude challenges
- Guided breathing exercises
- Music reflection prompts
- Photography challenges
- Creative-writing exercises
- Confidence-building activities
- Weekly kindness challenges
- Personalized milestone badges

Journal flow

Open journal → Select free writing, prompt, activity, or check-in → Create entry → Save privately → Review or edit later

Users should be able to:

- Download their entries
- Permanently delete individual entries
- Delete their complete journal
- Control backups
- Share an individual entry only through a deliberate, separate action

---

Tab 4: Profile and Account

Main purpose

Allow users to manage their identity, preferences, privacy, and data.

Profile sections

Public or community profile

- Display name
- Profile photograph
- General location
- Short biography
- Interests
- Joined communities
- Optional survivor story
- Optional recovery milestone

Private account information

- Legal name, only when operationally necessary
- Email address
- Password
- Age verification
- Notification preferences
- Login and security settings

Optional burn-related information

- Injury year
- General recovery stage
- Support interests
- Accessibility needs
- Topics the user is comfortable discussing

Burn-related data should not automatically appear publicly.

Visibility choices

Each applicable field can be:

- Only me
- Members of my groups
- All registered members
- Public, only where appropriate

Privacy and data controls

Users should have clear options to:

- View collected data
- Correct profile information
- Download their information
- Delete burn-related information
- Delete journal entries
- Delete their account
- Control email and push notifications
- Review blocked accounts
- Leave groups
- Report a privacy concern

Security controls

- Strong passwords
- Email verification
- Multi-factor authentication
- Session timeout on shared devices
- Encryption during transmission and storage
- Role-based administrator access
- Audit records for access to sensitive information
- Regular backups and security reviews

Tab 5: About Rekindle & Rise

Main purpose

Explain the mission, establish trust, and show the organization behind the community.

Recommended content

About the organization

Rekindle & Rise is a youth-led initiative that supports burn survivors through education, fundraising, care-kit projects, community activities, and survivor-centered events.

About the founder

Include:

- Founder Siya Gupta's name
- Her connection to the Saratoga community
- Why she created Rekindle & Rise
- Burn-prevention presentations delivered to elementary-school students
- Production of 30 care kits for burn patients at Santa Clara Valley Medical Center
- Her goal of building a supportive and compassionate survivor community

Additional sections

- Mission and vision
- Completed projects
- Upcoming goals
- Volunteer opportunities
- Partner organizations
- Contact form
- Instagram button
- **Visit Our Website** button linking to the Rekindle & Rise website
- Community safety statement
- Privacy policy
- Terms of use
- Medical disclaimer

---

5. Privacy and HIPAA Design Checkpoint

The app should not claim to be "HIPAA compliant" merely because it uses encryption or stores health-related information.

HIPAA applicability depends on how the app operates. HHS explains that most health information entered into a consumer-selected app is not protected by HIPAA unless the app is being provided by or operating for a HIPAA-covered entity or business associate.

If a hospital or health-care provider hires the app to create, receive, maintain, or transmit protected health information on its behalf, Rekindle & Rise or its technology provider may become a business associate. That would generally require appropriate Business Associate Agreements and compliance with applicable Privacy, Security, and Breach Notification requirements.

Even when HIPAA does not apply, the FTC Health Breach Notification Rule may apply to consumer health apps and can require notice to users, the FTC, and sometimes the media after certain unauthorized disclosures or breaches.

Because the platform may attract younger survivors, accounts for children under 13 should not be launched without a COPPA-compliant parental-consent and data-handling process.

Before development, the organization should determine:

1. Whether it will operate independently or partner with hospitals
2. Whether hospitals will send patient information to the app
3. Whether users will enter all information themselves
4. Which vendors will store messages, journal entries, and profiles
5. Whether each vendor will sign a Business Associate Agreement when necessary
6. Which information is truly required for the service
7. How users will access, export, correct, and delete their information

A privacy attorney and qualified security professional should review the final architecture before the platform handles sensitive health information.
